# Classics reinvented

**Cobalt SDN** is the mother of all our products, a starting point to mix and match with other products in our range. Cobalt SDN offers 28 striking colours, from classy neutrals to on-trend funky shades. The choice is yours! Give your creativity free rein and combine colours and designs to your heart's content. Mix and match Cobalt with our stylish new collections - Cobalt Creations, Hexagon Art, Relined, Grunge and Expression. Cobalt SDN can be ordered from stock in **wall-to-wall carpet and 50x50 cm carpet tiles**. Other sizes 25x100 cm, 50x100 cm and 100x100 cm are optional as from 100 m<sup>2</sup>. Acoustic SoundBloc tile backing is available from 200 m<sup>2</sup> onwards, reducing noise levels and improving underfoot comfort.

**Cobalt Creations** is a brand new modular concept, designed to create playful colour transitions. That way we're ensuring dynamic floors in every commercial or hospitality interior. With 11 colour options that blend seamlessly together with Cobalt SDN, Creations adds diversity from a multitude of installation design options. Transitioning from one zoned area to another is now possible without the use of hard lines.

Cobalt Creations is standard **available in 50x50 cm carpet tiles**. Carpet planks (25x100 cm) or XL tiles (50x100 cm and 100x100 cm) are optional as from 200 m<sup>2</sup> per colour onwards.

# Klassiekers heruitgevonden

**Cobalt SDN** is de moeder van al onze producten, een startpunt om te combineren met andere producten in ons assortiment. Cobalt SDN biedt 28 opvallende kleuren, van klassieke neutrale tinten tot trendy accentkleuren. De keuze is aan jou! Laat je creativiteit de vrije loop en combineer kleuren en dessins naar hartenlust. Mix en match Cobalt met onze stijlvolle nieuwe collecties - Cobalt Creations, Hexagon Art, Relined, Grunge en Expression. Cobalt SDN kan uit voorraad worden besteld in **kamerbreed tapijt en tapijttegels van 50x50 cm**. Andere formaten 25x100 cm, 50x100 cm en 100x100 cm zijn optioneel vanaf 100m<sup>2</sup>. Akoestische SoundBloc tegel-afwerking is beschikbaar vanaf 200 m<sup>2</sup>. Het geluidsniveau vermindert en het comfort onder je voeten verbetert.

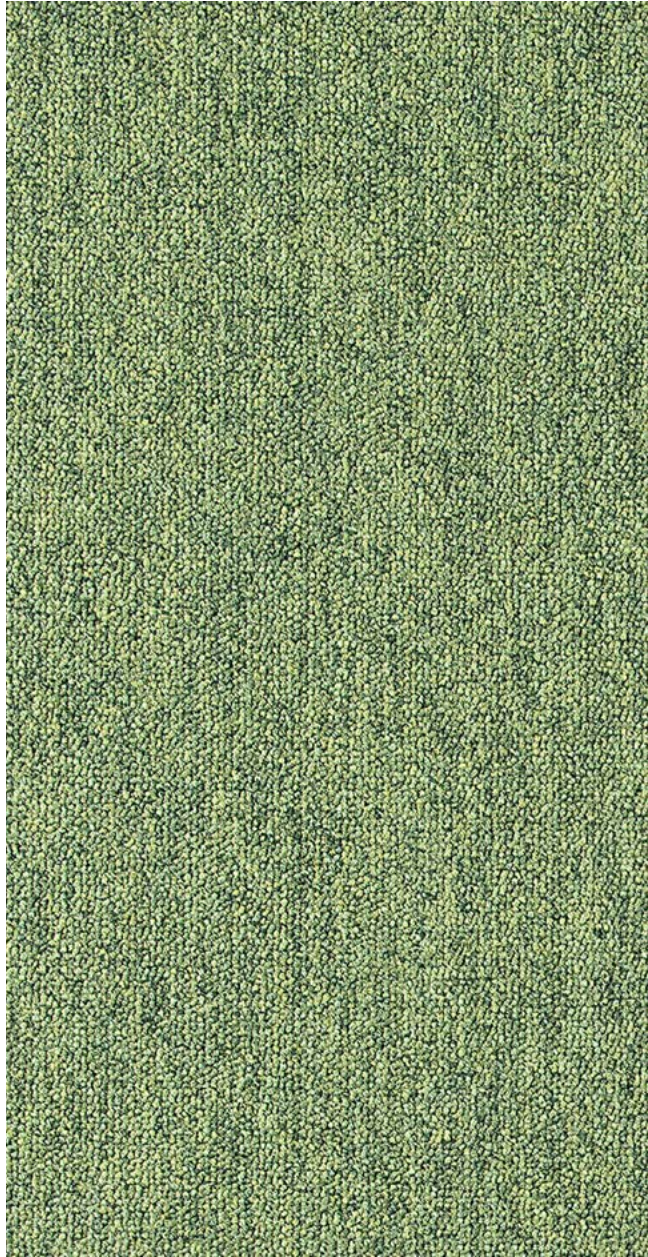

**Cobalt Creations** is een gloednieuw modulair concept, ontworpen om speelse kleurovergangen te creëren. Zo zorgen we voor dynamische vloeren in elk commercieel of horeca-interieur. Met 11 kleuropties die naadloos samensmelten met Cobalt SDN, voegt Creations diversiteit toe door de veelheid aan installatiemogelijkheden. Nu kan je een overgang van de ene zone naar de andere creëren zonder harde lijnen te gebruiken.

Cobalt Creations is standaard verkrijgbaar in **tapijttegels van 50x50 cm**. Tapijtplanken (25x100) of XL tegels (50x100 cm en 100x100 cm) zijn optioneel vanaf 200 m<sup>2</sup> per kleur.

## INSTALLATION DESIGNS

### Multitude of installation design options

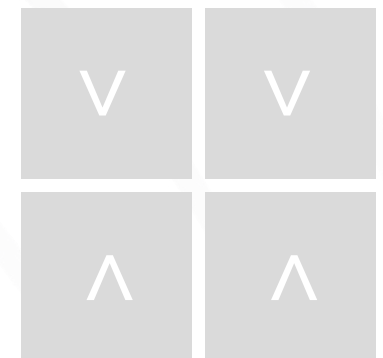

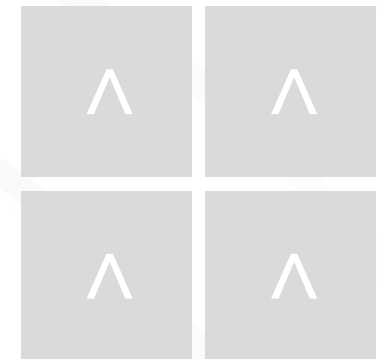

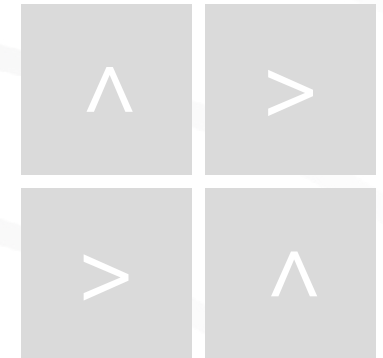

Another unique feature of these collections is its multitude of installation design options. Our transition tiles are produced in a specific way. As a result, every box of 20 tiles will hold 2 types of tiles: a regular one and its “mirror version”. Once you turn the “mirror tile” 180 degrees, it will create a continued transition with the regular tile.

Interior designers can work freely with our transition tiles, creating any dynamic floor layout for modern office or hospitality interiors.

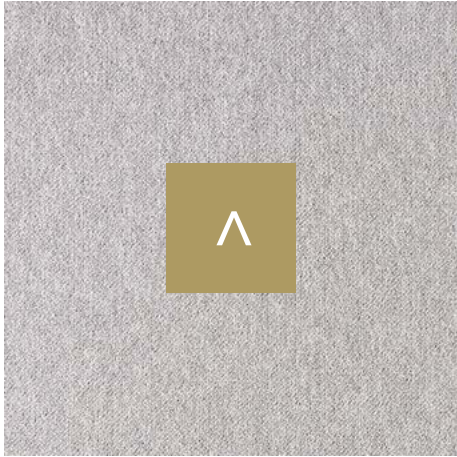

### Verschillende installatiemogelijkheden

Nog een unicum in deze collectie zijn de verschillende installatiemogelijkheden. Onze overgangstegels zijn geproduceerd op een specifieke manier. Elke doos van 20 tegels bevat twee types: de standaard overgangstegel en zijn spiegelbeeld. Wanneer je de spiegeltegels 180 graden draait, creëer je een voortdurende transitie met de standaard overgangstegel.

Interieurarchitecten en designers kunnen vrij werken met onze transitietegels. Je kan eender welke dynamische vloerlay-out creëren voor moderne kantoor- of horecaruimtes. Laat je creativiteit de vrije loop!

**SUSTAINABILITY**

## **Sustainable initiatives for a greener planet!**

Our carpets and our approach fit into today's world, as we are committed to ecology and sustainability. We are always looking for ways to make our carpets and carpet production more sustainable and ecological. We make this promise a reality with concrete **ecological solutions for a more sustainable modus operandi.**

## **Duurzame initiatieven voor een groenere planeet!**

Onze tapijten en aanpak passen in de wereld van nu, want ecologie en duurzaamheid dragen we hoog in het vaandel. We zijn steeds op zoek manieren om onze tapijten en tapijtproductie duurzamer en meer ecologisch te maken. Dat zijn geen loze woorden, **we maken onze beloftes waar aan de hand van concrete initiatieven.**

# Ecofuse

The adhesive compound  
Het kleefmiddel

Ecofuse is our ecological alternative to the traditional latex adhesive compound in both wall-to-wall carpet and carpet tiles. We replace the latex by a sustainable, post-consumer product called PVB (PolyVinyl Butyral), extracted from used car windows and laminated building glass.

Ecofuse is ons ecologisch alternatief voor het traditionele kleefmiddel in kamerbreed tapijt en tapijttegels. We vervangen latex door een duurzaam, post-consumer product genaamd PVB (PolyVinyl Butyral), gewonnen uit gebruikte autoruiten en gelaagd glas van gebouwen.

**of sustainable origin**  
van duurzame oorsprong

**non-toxic**  
niet giftig

**futureproof**  
klaar voor de toekomst

**By switching to PVB, we reduce 500 tonnes of latex on average!**  
Door over te stappen naar PVB reduceren we maar liefst 500 ton latex!

## Ecofuse in our carpets

At Tapibel, we use Ecofuse in many of our carpets. Both in broadloom and in carpet tile.

### Precoat

The first adhesive layer between yarn and primary backing, to ensure that the yarns bond firmly.

### Secondary backing

A second adhesive layer is applied to glue the action or felt backing onto the actual carpet. This final process ensures that the broadloom carpet obtains more body and rigidity.

## Ecofuse in onze tapijten

Bij Tapibel gebruiken we Ecofuse in heel wat van onze tapijten. Zowel in kamerbreed als in tapijttegel.

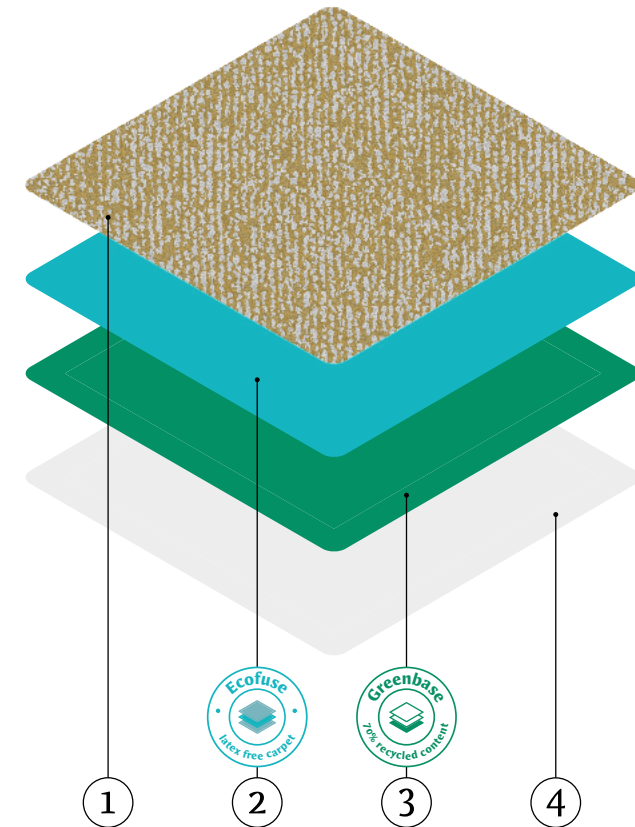

### Precoat

De eerste kleeflaag tussen het garen en het tuftdoek, om te garanderen dat het garen niet los kan komen uit het tapijt.

### Rug van tapijt

Een tweede kleeflaag wordt aangebracht om de action back of viltrug te verkleven met het tapijt. Die laatste stap zorgt ervoor dat het kamerbreed tapijt meer vorm krijgt en steviger wordt.

**Curious to know more about the complete PVB production process? Find out in our video.**  
**Benieuwd naar het volledige productieproces van PVB? Je ontdekt het in onze video.**

# Greenbase

The modified bitumen backing  
De gemodificeerde bitumen rug

Greenbase, short for modified bitumen, is a more sustainable solution for carpet tile backing. It consists of **70% recycled materials** (diverted from a waste stream of the limestone mining), which makes it less harmful to the planet. Greenbase guarantees both dimensional stability and strength in the final product.

Greenbase, ofwel gemodificeerde bitumen, is een duurzamer alternatief voor de afwerking van tapijttegels. Het bevat **70% gerecycleerd materiaal** (afkomstig van de afvalstroom van de kalksteenmijnbouw), wat het minder schadelijk maakt voor de planeet. Greenbase garandeert zowel dimensionele stabiliteit als stevigheid in het eindproduct.

## Other sustainability initiatives

### Andere duurzaamheidsinitiatieven

the 2.500 solar panels on the roof  
de 2.500 zonnepanelen op het dak

electric charging stations in the car park  
elektrische oplaadpalen op de parking

simultaneous dispatch of samples and orders  
gelijktijdige verzending van stalen en bestellingen
