

COLLECTION
2026 - 2027

Your carpet, our tradition.

We are Tapibel, a **passionate carpet manufacturer** based in **Pelt (Belgium)**. We offer modular flooring concepts for every space. Our goal? Sparking creativity with our **innovative and sustainable collections**. Available in carpet tiles, wall-to-wall carpet and rugs. Get inspired!

Common thread of tradition and respect

Everything starts with the yarn and the fibres. Every carpet and every floor covering starts as a bobbin of basic yarn, comprising millions of yarns that are processed into one whole. The people behind Tapibel know the world of carpets like the back of their hands. We have been true **carpet masters for over fifty years**, producing both tufted and needle-felt carpet. We have been passing on the knowledge of carpet production **from generation to generation** since 1970.

You can see, hear and feel **our tradition**: in the authentic factory, in the innovative products, but above all, in the people behind Tapibel. What is our common thread? Respect. Respect for each other, our products, the machines and of course, our customers. The relationships we establish with customers and employees are always **sustainable, open and honest**.

We work with machines to manufacture our carpets and carpet tiles, but **humanity is the central theme**. Our employees operate the machines, fill them, adjust them and check the carpets carefully. It's all in the details. Quality and service are key, loose ends (and loose threads) don't stand a chance. Most of our tufted carpets are intended for the contract market, specifically for use in offices, hotels and public buildings. Our needle-felt carpet is in demand in the event sector.

Strong cohesion

The yarn is processed in the tufting machine. Whether we make a loop pile or cut pile, we always produce a strong and durable carpet. Our employees and customers also strengthen our operation. We prefer to call them **“family”** because it describes our relationship so much better. They are inextricably linked to Tapibel and have worked for decades to make the company what it is today. Each and every day. Thanks to them, we can offer our high-quality products and services.

Flexible connection

The carpet is finished with a strong adhesive compound that holds and connects all the yarns or fibres together. The result is that it forms one whole and remains in good condition. **Flexibility and connection** form the basic yarn of Tapibel. We are prepared to develop and make tailored solutions to our customers. Do you need a smaller number of square metres or maybe more? Do you need a special carpet for an event? We can talk about it. We want to get to know you as a customer and build a strong bond. And we prefer to do that informally.

Global carpet

The result is global carpet. We use the word “global” because Tapibel is a Belgian carpet producer with an international character. We serve customers all over the world. We have customers as far afield as Finland to Cyprus, and from Iceland to Dubai. That means that we naturally take the traditions, customs and trends of the countries to which we export our products into account.

Our carpets and approach are a great fit for today's world because **we consider ecology and sustainability** to be of paramount importance. We are always looking for ways to make our carpet production more sustainable and ecological. Find out more about all our sustainable initiatives here. We keep our promises and make our promises achievable and tangible.

From basic yarn to carpet, Tapibel is a known, reliable partner in the carpet industry. We continue innovating and focussing on (the carpet of) the future without losing sight of our common values.

Twise: sustainable initiatives for a greener planet

Our carpets and our approach fit into today's world as we are committed to ecology and sustainability. We are always looking for ways to make our carpets and carpet production more sustainable and ecological. We make this promise a reality with concrete **ecological solutions for a more sustainable modus operandi.**

Discover Twise, Tapibel's sustainability brand.

Why Twise?

1. Tapibel is "wise" to produce greener carpets.
2. All sustainable solutions contain recyclable material.
We give it a second (and third, fourth, ...) life.

The result?

A more sustainable and ecological carpet, from the yarn to the backing.

As a family business, we also think of the next generations. Thanks to these adjustments they can enjoy a greener world and greener carpet.

Ecofuse

The adhesive

Ecofuse is our **ecological alternative to the traditional latex adhesive** compound in wall-to-wall carpet, carpet tiles and rugs. We replace the latex with a sustainable, post-consumer product called PVB (PolyVinyl Butyral), extracted from used car windows and laminated building glass.

The benefits

of sustainable origin

non-toxic

future-proof

The switch to PVB results
in a latex reduction of
500 tonnes!

Scan the QR code
and discover the PVB
production process!

Ecofuse in our carpets

At Tapibel, we use Ecofuse in many of our carpets. Both in wall-to-wall, in carpet tile and rug.

Precoat

The first adhesive layer between yarn and primary backing to ensure that the yarns bond firmly.

Secondary backing

A second adhesive layer is applied to glue the action or felt backing onto the actual carpet. This final process ensures that the wall-to-wall carpet obtains more body and rigidity.

3

Greenbase

4

Cover sheet

Greenbase

The modified bitumen backing

Greenbase, short for modified bitumen, is a more sustainable solution for carpet tile backing. It consists of **70% recycled materials** (diverted from a waste stream of limestone mining) which makes it less harmful to the planet. Greenbase guarantees both dimensional stability and strength in the final product.

70%
recycled
materials

ECONYL®

The yarns

ECONYL®
REGENERATED NYLON

The yarn of several of our collections are made of ECONYL®. The material is made of **100% of Nylon 6 waste**. ECONYL® has exactly the same properties as standard nylon with a more durable edge: it can be regenerated indefinitely without loss of quality.

By recycling the materials ECONYL® yarn contributes to a **circular economy**.

Currently, **25%**
of **the yarns** we use in
production are **ECONYL®**.

Compared to virgin materials,
ECONYL®'s **CO₂ emissions** are
reduced by **74%**.

The ECONYL® Regeneration System by Aquafil

1. Rescue

Aquafil collects waste (fishing nets, dust scraps, old carpets, etc.). The materials are cleaned and sorted.

2. Regenerate

After a thorough regeneration and purification process, the nylon waste is returned to its original state.

3. Remake

ECONYL® regenerated nylon is processed into yarns.

4. Reimagine

With this new yarn, manufacturers such as Tapibel can get to work and create new carpet collections made with ECONYL®.

Measurable Environmental Impact with EPD

We reinforce our sustainability initiatives with two **Environmental Product Declarations (EPD)**. These certificates underline our commitment to sustainability and prove that design and environmental awareness go hand in hand. No empty words, but concrete actions with real impact.

1. EPD for ECONYL® tile collections

ECONYL® yarn is made from 100% regenerated nylon. This way, the carpet tiles contribute to a circular future with less waste and up to **90% lower CO₂ emissions** compared to standard PA6 nylon.

2. EPD for Cobalt tile collections

Thanks to the latest innovations in the production process, the **environmental impact of the yarn is reduced by as much as 46%**.

Lower CO₂
emissions up
to 90%

Other sustainability initiatives

a large solar panel park on the roof

The 2500 solar panels generate 500 MW/year which represents 35% of our total electricity consumption.

electric charging stations in the car park

We encourage employees and visitors to drive electric. The charging stations in the car park provide a boost.

simultaneous dispatch of samples and orders

We keep polluting transports to a minimum by sending as many orders as possible at the same time.

ecological packaging for our carpets

We pack our carpets in recyclable cardboard boxes.

a heat pump for the offices

The heat pump is powered by the solar panels and extracts heat and cold from the constant temperature of the ground. 9000 metres of ducts filled with water in underfloor heating and a climate ceiling ensure a pleasant temperature.

Discover TRIFORMA +

When it comes to creating carpets that combine beauty and performance, TRIFORMA + sets a new standard. Developed by Aquafil's decades of expertise and innovation, this unique yarn technology brings together durability, colour brilliance, versatility, and advanced protection. All in one solution. It's designed to deliver reliable performance over time in demanding environments, while offering endless creative possibilities.

Our **Elemental Design Collections** are made using TRIFORMA +, ensuring every design reflects this superior quality and innovation.

A promise of quality, creativity and reliability

1. Innovation and performance

Engineered with a special polymer, TRIFORMA + **resists acid-based stains and enhances cleanability**. Its profile is designed to maintain aesthetic appeal, even under challenging conditions. This makes everyday maintenance easier and helps carpets look better for longer.

2. Unsurpassed durability

Built for heavy-traffic areas, TRIFORMA + delivers exceptional mechanical strength and long-term stability. It meets **Class 33** standards, ensuring your carpet performs flawlessly even in the most demanding applications.

3. Brilliant, long-lasting colours

Whether you want subtle tones or bold statements, this yarn technology guarantees **vibrant colours that remain beautiful over time**. Design flexibility and colour stability come together to support lasting visual impact.

Compose your ideal carpet

The possibilities are endless with carpet. There are dozens of colours available, in different sizes, with or without special finishes. Add to that the myriad of installation layouts from modular carpet tiles and you can **easily create unique floor concepts**.

Because that personal touch is so important, you can create your own carpet at Tapibel, **starting from as little as 200 m²**.

First things first, **the tile format**. Do you choose the larger square tiles (100 x 100 cm) or do you prefer the rectangular tiles of 100 x 50 cm? Want something more special in your interior? The carpet planks of 25 x 100 cm make every room an eye-catcher.

Foot comfort and good acoustics are important advantages of carpet. All our carpet collections are designed with high-quality, durable materials that promote user well-being through good foot comfort and quiet acoustics. Do you want to optimize those two aspects even further? Then choose **Soundbloc** to finish the back of your carpet tile. That way you can enjoy the best that carpet has to offer.

Haven't found what you are looking for in the colour bank of a collection? Tapibel offers the **Cobalt Colour Concept**. Read more about it on the following pages.

Tile format

Today’s working environments or hospitality interiors feature more than just one design or colour style. Interior designers prefer a more **sophisticated** and **creative carpet look** that can be combined with hard flooring specifications. A **unique signature** to each of their projects.

At Tapibel we emphasize the importance of this **modular flooring trend**. For projects **exceeding 200 m²**, **special tile sizes** are made available in both Greenbase or Soundbloc backing.

Custom made tile/plank orders may result in an overproduction of about 10% which is mandatory to purchase. Keep this in mind when you calculate and budget your project work.

Soundbloc

Carpet is a natural sound absorber and reduces impact noise while absorbing sound within the space. **All our qualities** have **sound absorbing properties** and **reduce impact noise**. Several collections even reach the α_w 0,35 treshold, reducing sound up to 50%.

Sound is an **important aspect** in many buildings like office environments, hotels, schools and educational facilities, hospitals, nursing homes and healthcare infrastructure. In all these environments, bad acoustics and intrusive sounds can damage the functionality of the environment.

Modern office workplaces should support work optimally and provide a positive ambiance to the employees. Furthermore, they should encourage staff motivation and the power of concentration. Flexible office structures combined with communicative room structures meet those demands best. Create a **productive environment** by **improving room acoustics** with our **Soundbloc technology**. Add an extra layer of comfort under working feet and transform offices into pleasant working spaces.

①
Tufted **polyamide top cloth** on a **polyester fleece primary backing** with a **precoat** finish for improved fibre bond

②
Bitumen with **glass fibre scrim secondary backing** to assure dimensional stability and improve laying properties

③
500gr **Soundbloc** polyester felt backing to increase acoustic performance, durability and underfoot comfort

Cobalt Colour Concept

28 Cobalt colours to create from

At Tapibel we love a creative challenge and we like to stimulate your imagination. Do you want to create a truly unique floor? Then you have to look beyond our stock collections.

Our **Cobalt Colour concept** will surely fire up your creativity. For projects of over **400 m²**, we can customise any dazzling floor:

Step 1: Choose the desired design from our Cobalt Design or ECONYL® Design Collections.

Step 2: Choose the two Cobalt SDN colours from our 28 available options.

Step 3: Order your customised sample.

Carpet tiles, wall-to-wall carpet & rugs

At Tapibel, we produce carpet collections in three varieties: modular carpet tiles, wall-to-wall carpet and rugs.

Carpet tiles

Carpet tiles offer endless creative possibilities. Create your own modular floor design in no time. You can order standard qualities from stock. The standard carpet tile size is 50x50 cm. Other sizes, including 25x100 cm, are also available in some cases.

Wall-to-wall carpet

There is a wall-to-wall carpet for every room and setting – from a hotel or entrance hall, to a bedroom or event location. Carpet is suitable for both residential and commercial interiors. One of the advantages? The seamless look.

Rugs

Enter a world where luxury takes on new meaning. Tapibel introduces: the Tapibel rugs. Our rugs make a statement in any space. They combine refined aesthetics with sustainability thanks to ECONYL® thread.

Want to know in which version(s) a collection is available?

We indicate this with a symbol in the technical details.

Country SDN

Country SDN is without doubt **a unique collection thanks to the ultratuft technology.** This special production method results in an extremely durable and wear-resistant carpet. Country SDN is the ideal choice for demanding and frequently used areas such as entrance halls, corridors and offices. The typical flat weave look and appearance of Country SDN can often be found in Scandinavian countries. The collection is available in nine minimalist solid colours.

Crossline

Crossline is the latest addition to the Cobalt Design Collections. **The unique criss-cross line pattern creates a bold and playful effect.** Moreover, the line design beautifully lends itself to tiling. It can be laid randomly without zippers thanks to the length and lines. The bold pattern is particularly well-suited to hospitality and office environments. Choose from 17 colour options ranging from out-of-the-box ochre yellow to classic anthracite.

Diamond Art

Diamond Art has a **check pattern with a concrete look** that draws your gaze to the floor. There is also a diamond pattern in it. This stylish pattern fits any interior, from the contract market to the hospitality sector. The regenerable ECONYL® yarn also makes it an ecological choice. Diamond Art is available in 12 different neutral colours. Combine the bold print of Diamond Art with Groove Tones to create an original look.

Diplomat

When it comes to look and feel, Diplomat resembles President E. What are the biggest differences? Diplomat is more **budget-friendly and made with nylon SDN yarns** instead of ECONYL®. The collection combines sturdiness with quality, while the structure and stylish design bring elegance to any room. It is the standard for floor coverings in both commercial and residential environments. The cut pile with frieze creates a nice finish and an interesting look. This robust carpet is also quite durable, so there's no compromise on performance.

Elemental

Elemental is a collection of pared-down solid colours, designed to bring balance, simplicity, and harmony to any interior design concept. The collection is constructed from TRIFORMA + yarn: sustainable, colourfast, and resistant to heavy use. The use of smart-structured yarn makes the collection dirt-resistant.

This collection is the **basic quality from the Elemental Design Collections** and fits seamlessly with the patterns of the other Elemental Design Collections: Sienna and Nimbus. Thanks to the uniform pile height, you can effortlessly combine the basic colours and (tricolour!) designs in one room. This is how you create dynamism using soft transitions and stylish layering. The collection features 14 colours: nine timeless basic shades and five expressive accent colours.

Powered by TRIFORMA + yarn technology, Elemental delivers advanced performance and easy maintenance. Engineered with a special polymer, it resists acid-based stains and ensures long-term aesthetic appeal. Even in demanding environments.

Madera

Madera has **a playful texture** that makes the carpet suitable for high-end residential projects. It also comes into its own in the hospitality sector. Madera is the little sister of Almyra, Soneva and Medina. We use the same core yarn in production. The colours Bora Bora, Wyoming and Whale Bay also feature in this collection. Like the New Worlds collections, Madera (Primo) is an ecological choice; the carpet is made of 100% regenerated ECONYL® yarn. First-class softness and sustainability in one.

Nimbus

Nimbus, **part of the Elemental Design Collections**, adds softness to your interiors. The subtle design provides a hint of movement, perfect for those who love sophistication with a twist. The carpet is composed of TRIFORMA + yarn, a guarantee of colourfastness, ease of care, and sustainability. Moreover, the collection is dirt-resistant thanks to its smart-structured yarn.

The structure is playful, and like Sienna and Elemental, the pile height is the same, allowing you to seamlessly combine the designs with the solid colours from the collections. Opt for tone-on-tone tranquillity or accentuate with contrasts; the combination possibilities are endless. Interested in something a bit extra? Then go for one of the unique tricolour designs. Add an extra splash of colour such as orange, aqua, or purple.

Nimbus is crafted with TRIFORMA + for exceptional performance and refined elegance. Its innovative polymer enhances cleanability and preserves the carpet's appeal over time.

Oak 59432

Oak

Oak **brings nature into any interior.** We got the idea for this collection from popular wooden floors. We incorporated the beauty of nature into a wood-effect carpet plank. Yes, a plank, not a standard tile. The plank shape emphasises the natural look of the carpet. In addition to being unique, Oak is also sustainable. The collection is made from regenerated ECONYL® yarn. This unique floor concept lets interior designers indulge themselves. Oak is suitable for commercial use. Thanks to its organic and warm appearance, it is a winner in public spaces. It is equally suitable for a lobby, entrance hall or town hall.

Opal

Opal has **a residential quality but is easily at home in commercial spaces.** The structured yarn creates a playful character for commercial settings. In addition, the shaggy look of Opal makes the carpet ideal for cutting as a loose carpet. The collection is available in 9 warm colours, ranging from cream to dark brown.

Shoreline 65022

Shoreline

Shoreline is **the ecological variant of Expression**. The ECONYL® yarn makes this collection a sustainable gem. Like Expression, Shoreline is daring and expressive. The ship's wood or paintbrush pattern catches the eye and holds the attention. The pattern on the carpet creates an interesting floor concept. Shoreline consists of 12 colour options, ranging from warm, natural tones to some fresh, bright colours.

Sienna

Sienna is **part of the Elemental Design Collections**, along with Elemental and Nimbus. It is a visually powerful, layered pattern. The loop pile construction and the use of TRIFORMA + yarn make this collection not only visually strong, but also extremely hard-wearing and low maintenance. A floor with spirit and practicality. Moreover, the collection is dirt-resistant thanks to its smart-structured yarn.

This collection is designed to give interiors depth without being overpowering. The colour palette and designs are precisely matched to Elemental's solid colours, so you can effortlessly combine them into one flowing floor concept. The even pile height between designs and basic colours thereby ensures a flawless technical fit. Interested in something a bit extra? Then go for one of the unique tricolour designs with an extra splash of colour. Choose from orange, aqua, royal blue, bright green, or purple.

Sienna benefits from TRIFORMA + innovation, delivering superior durability and easy care. The yarn's advanced polymer guarantees lasting aesthetics and resistance to acid-based stains.

Signature Collections

Three exclusive carpet collections combine refined design with understated luxury. Each one features unique patterns and is made with sustainable ECONYL® yarn, for those who seek character, quality and conscious design in perfect harmony.

Signature Origin

The first collection in the Signature family, an entry-level quality. Think luxurious patterns printed on a soft cut pile with a **pile weight of 900 g/m²**. This is the perfect choice for hotels, lobbies, corridors or elegant residential projects.

Signature Prestige

A higher **pile weight (1200 g/m²)**, the cute pile and an even richer look and feel make Signature Prestige the most sumptuous in the range. Ideal for reception areas, suites or prestigious rooms.

Signature Art

Signature Art brings expressive designs to life through a **robust loop pile** (780 g/m²). The structured surface creates a graphic effect that adds texture and movement to your floor. This is perfect for any hospitality setting. From lobbies to connecting corridors.

Soneva 62040

Soneva

Soneva takes **softness and luxury to the next level**. This velvet carpet with a soft touch feels wonderful under your feet. Soneva is also an ecological choice; it is made from 100% regenerated ECONYL® nylon yarn. This means you are choosing luxury and sustainability. Despite its softness, Soneva doesn't compromise on performance thanks to the resilient two-ply solution dyed yarn. Choose from 12 timeless colours to take any commercial flooring project to the next level.

Vintage

Vintage is perhaps one of Tapibel's **most original collections**. The artistic patchwork prints create a warm atmosphere. The sustainable ECONYL® carpet is originally made white and is then printed with ChromoJet technology. Dare to think outside the box and design your own unique floor concept. Each room can tell its own story using the three unique Vintage collection patterns:

Felina

A criss-cross pattern that closely resembles typical patchwork.

Firenze

A static pattern with accents of columns from ancient Florence.

Ferrara

A calmer weave pattern with bright colour combinations.

The three patterns are available in six coloured prints that you can mix and match.
