

New Worlds

A woman with blonde hair is resting her head on the shoulder of a large, classical marble statue. She is looking upwards with a serene expression. The background is a blurred museum setting with stone columns and warm lighting.

The luxurious world of New Worlds

Step inside the luxurious world of New Worlds, a world where marine animals are king and waste gets a new life thanks to ECONYL®. Tapibel proudly introduces the regal New Worlds collections: **Soneva, Almyra, Matera, Matera Primo, Medina and Zalina.** What connects them? The same core yarn that appears in every collection, each of which features incredibly soft, luxurious, and sustainable qualities.

Short pile
Lush
Soft

Almyra

Almyra is the short pile version of Soneva. The collection takes softness and luxury to a higher level. This velvet carpet with a soft touch offers the ultimate in foot comfort, like downy feathers tickling your toes. Despite its softness, Almyra doesn't compromise on performance thanks to the resilient two-thread solution dyed yarn.

Choose from twelve warm colours to make any commercial flooring project a resounding success.

Matera Primo

Matera Primo is the luxurious version of Matera. The higher pile and density create a truly luxurious look and feel. The lush texture makes this carpet perfect for high-quality residential projects, but equally well suited to the hospitality sector. You can expect nothing but the best performance thanks to the resilient three-thread solution dyed yarn.

Choose from eleven timeless colours for any residential or hospitality project.

Technical specifications

Style: cut-pile (frisé)

Pile composition: 100% PA 6 – ECONYL® - heatset

Pile height: 9,0 mm

Classification: class 33 (heavy commercial)

Pile weight: 2.000 g/m²

Fire resistance: Cfl-S1

Medina

Medina has a playful rib effect that resembles the look of a hand-tufted carpet. The collection is particularly well suited to high-quality residential settings and the hospitality sector.

With its high pile and density, the Medina is the most luxurious collection in the New Worlds family. A velvety finish gives it that little bit of extra flair. Expect nothing but the best performance thanks to the resilient two-thread solution dyed yarn. The quality is available on a 4 m action back.

Choose from six timeless colours for incorporating luxury into any flooring project.

Technical specifications

Style: 2-ply rib velvet

Pile composition: 100% PA 6 – ECONYL®

Pile height: 11,5 mm

Sustainable design with ECONYL®

The New Worlds collections align perfectly with our sustainability vision. After all, Tapibel wants to make both the planet and carpet production more ecologically sound. We achieve this with our own sustainability brand called **Twise**.

Twise, because Tapibel is wise to support smart carpet production for a greener planet. That's how we contribute to a circular economy and reduce waste. All our solutions contain regenerated or recycled material. This means we give used materials a second (and third, fourth, etc.) life. Twise includes **ECONYL®**, a yarn made from regenerated nylon that we use in our New Worlds collections.

From old fishing net to carpet

What starts out as an old fishing net turns into a **sustainable piece of design**. Our partner Aquafil collects fishing nets, old carpets, and other nylon waste and cleans them.

The regeneration process is a long one in which Aquafil transforms the waste into new **ECONYL®** yarns that are 100% recyclable. Tapibel gives that yarn a second life in the New Worlds carpet collections.

Did you know that **ECONYL®** emits 74% fewer CO₂ emissions during production?

Measurable Environmental Impact with EPD

We reinforce our sustainability initiatives with **Environmental Product Declarations (EPD)**. These certificates underline our commitment to sustainability and prove that design and environmental awareness go hand in hand. No empty words, but concrete actions with real impact.

ECONYL® yarn is made from 100% regenerated nylon. This way, the carpet tiles contribute to a circular future with less waste and up to **90% lower CO₂ emissions** compared to standard PA6 nylon.
