

Elemental Design Collections

Tapibel
Your carpet, our tradition

Powerful, versatile basis

Tapibel's **Elemental Design Collections** combine aesthetics, functionality and reliability in a smart flooring solution. The yarn composition has been carefully chosen for durability and ease of use. The cationic yarn also makes the carpet more resistant to stains. Even in high-traffic environments, it retains its quality effortlessly. So it is ideal for offices, hospitality environments and public spaces. The collections are available in carpet tiles and wall-to-wall carpet.

The Elemental family consists of three collections, each with its own character:

- **Elemental** stands for pure simplicity in strong, timeless uni colours.
- **Sienna** plays with a layered pattern that adds depth and dynamism to any space.
- **Nimbus** surprises with a subtle design that brings calm without being boring.

What connects them? The unique tricolour designs that create a sophisticated play of colours, whatever the style or application.

versatile

Elemental

Elemental is the basic quality within this collection. The uni colours create a harmonious, timeless base that brings tranquillity to any room. Thanks to their understated elegance and subtle depth, they integrate effortlessly into a variety of interiors: from modern workplaces and meeting rooms to minimalist hospitality environments such as hotel lobbies or guest rooms. Elemental is the ideal choice for those looking for simplicity with impact. Elemental is available in carpet tiles and wall-to-wall carpet.

Sienna

Sienna brings a subtle pattern with a layered character. The design is composed of multiple levels of colour that seem to move on top of each other. This creates a lively floor with character, without it feeling crowded. With the unique tri-coloured designs, you create surprising depth and nuance. Ideal for offices, corridors or retail spaces where dynamism and appearance come together. Sienna is available in carpet tiles and wall-to-wall carpet.

Nimbus

Nimbus is designed for those who love sophistication. The soft pattern brings structure and movement to flooring, but remains discreet and harmonious. Interested in something a bit extra? Then choose one of the unique tricolour designs. Add an extra splash of colour such as orange, aqua or purple. Perfect for meeting rooms, hotel lobbies or lounges where atmosphere and comfort are key. Nimbus is available in carpet tiles and wall-to-wall carpet.

Twise: sustainable initiatives for a greener planet

T W I S E

Our carpets and our approach fit into today's world, as we are committed to ecology and sustainability. We are always looking for ways to make our carpets and carpet production more sustainable and ecological. We make this promise a reality with concrete **ecological solutions for a more sustainable modus operandi.**

Discover Twise, Tapibel's sustainability brand.

Why Twise?

1. Tapibel is "wise" to produce greener carpets.
2. All sustainable solutions contain recyclable material. We give it a second (and third, fourth, ...) life.

The result?

A more sustainable and ecological carpet, from the yarn to the backing.

As a family business, we also think of the next generations. Thanks to these adjustments, they too can enjoy a greener world and greener carpet.

Ecofuse

The adhesive

Ecofuse is our **ecological alternative to the traditional latex adhesive** compound in wall-to-wall carpet, carpet tiles and rugs. We replace the latex by a sustainable, post-consumer product called PVB (PolyVinyl Butyral), extracted from used car windows and laminated building glass.

The benefits

of sustainable origin

non-toxic

future-proof

The switch to PVB results
in a latex reduction of
500 tonnes!

Scan the QR code
and discover the PVB
production process!

Ecofuse in our carpets

At Tapibel, we use Ecofuse in many of our carpets. Both in wall-to-wall, in carpet tile and rugs.

Precoat

The first adhesive layer between yarn and primary backing, to ensure that the yarns bond firmly.

Secondary backing

A second adhesive layer is applied to glue the action or felt backing onto the actual carpet. This final process ensures that the wall-to-wall carpet obtains more body and rigidity.

Greenbase

The modified bitumen backing

Yarn

2

Precoat
Ecofuse

3

Greenbase

4

Cover sheet

Greenbase, short for modified bitumen, is a more sustainable solution for carpet tile backing. It consists of **70% recycled materials** (diverted from a waste stream of the limestone mining), which makes it less harmful to the planet. Greenbase guarantees both dimensional stability and strength in the final product.

70%

materials

Measurable Environmental Impact with EPD

We reinforce our sustainability initiatives with two **Environmental Product Declarations (EPD)**. These certificates underline our commitment to sustainability and prove that design and environmental awareness go hand in hand. No empty words, but concrete actions with real impact.

Thanks to the latest innovations in the production process, the **environmental impact of the yarn is reduced by as much as 46%**.

Other sustainability initiatives

the 2,500 solar panels on the roof

ecological packaging for our carpets

electric charging stations in the car park

a geothermal heat pump system for the offices and showroom

Discover TRIFORMA™+

When it comes to creating carpets that combine beauty and performance, TRIFORMA™+ sets a new standard. Developed by Aquafil's decades of expertise and innovation, this unique yarn technology brings together durability, colour brilliance, versatility, and advanced protection. All in one solution. It's designed to deliver reliable performance over time in demanding environments, while offering endless creative possibilities.

Our **Elemental Design Collections** are made using TRIFORMA™+, ensuring every design reflects this superior quality and innovation.

A promise of quality, creativity and reliability

1. Innovation and performance

Engineered with a special polymer, TRIFORMA™+ **resists acid-based stains and enhances cleanability**. Its profile is designed to maintain aesthetic appeal, even under challenging conditions. This makes everyday maintenance easier and helps carpets look better for longer.

2. Unsurpassed durability

Built for heavy-traffic areas, TRIFORMA™+ delivers exceptional mechanical strength and long-term stability. It meets **Class 33** standards, ensuring your carpet performs flawlessly even in the most demanding applications.

3. Brilliant, long-lasting colours

Whether you want subtle tones or bold statements, this yarn technology guarantees **vibrant colours that remain beautiful over time**. Design flexibility and colour stability come together to support lasting visual impact.
